## **American & Smokey Brown Roaches**

Roach Information- Now that the weather is cooler, the big outdoor roaches are coming in to get out of the cold. These roaches, sometimes called a Palmetto bug, wood roach, tree roach or flying roach are best handled by using baits. These baits are best used at night, when roaches are actively feeding. You must locate the nesting site and eliminate it if possible and treat the area properly to gain control of the infestation.

### **Typical nesting sites are:**

Oak trees	Willow tress
Gum trees	Woodpiles
Magnolia trees	Monkey grass
Pecan trees	Over mulched gardens

### **Control can be handled using a product such as:**

- SUSPEND SC
- TALSTAR P
- TEMPO

### **Baits used are:**

- MAXFORCE FC
- SEIGE PBS GEL
- NIBAN
